

4/27/2015 Speaker Panel

Polling Results

We provided opportunities to participate online and in-person.

Looking at demographic data, the online community is more representative of Boulder.

However the online community didn't participate in the poll in the same numbers so their results are diluted by the in-person demographics.

References

- US Census, <http://censusreporter.org/profiles/16000US0807850-boulder-co/>

73.3% valued attending the event.

This event was a good use of my time.

Boulder is 51% Renters.

- Online, renters accounted for 45% of respondents.
- In-person, renters made up 24.11%

Do you own or rent?

53% of Boulder population is under 30.

- Online, 40% of respondents were under 36.
- In-person, renters made up 17.14%

We polled twice to gauge changes in opinion.

- *Initial*: Before speaker panel
- *Post*: After speaker panel

**City permanently affordable housing programs
cause the rest of home buyers and renters to
pay more for housing**

**Employment growth increases pressure on
housing prices**

**To address our affordability issues, the city
should encourage the preservation of existing
affordable housing**

**To address our affordability issues, the city
should encourage the construction of new
housing**

**City housing efforts should focus on changing
what types of new housing is built**

**City efforts should focus on using existing
housing more efficiently**

I am willing to support changes in my neighborhood - if it makes housing more affordable and the impacts are fully considered
